

KEVIN COLLINS

Software Engineer

A student completing my Computer Systems (Bachelor of Science) Course in University of Limerick. Across Second, Third Year and 4th Year I achieved a 3.77 QCA, with 17 A's across the 19 modules. Working with Intel's cloud native team developed my knowledge of modern practices and honed my craft to produce consistently high quality deliverables. Focused interest in the fields of Machine Learning and Data Analytics. Extremely driven and immerse myself in learning new skills at every opportunity.

EDUCATION

BSc Computer Systems - 3.77 QCA University of Limerick

Year 4 (2024-2025) – Overall 3.7 QCA

A1
Neural Computing, Advanced Programming Concepts
A2
Big Data Management and Security

Year 3 (2023-2024) – Overall 3.84 QCA

A1
Machine Learning: Methods and Applications, Software Development Project, Project Management and Practice
A2
Mobile Application Development, Professional Issues in Computing

Year 2 (2022-2023) – Overall 3.76 QCA

A1
Software Testing and Inspection, Database Systems, Intelligent Systems, Event Driven Programming, Data Structures and Algorithms
A2
Object Orientated Development, Operating Systems, Software Requirements, Modelling and Computer Graphics

Year 1 (2021-2022) – Overall 3.68 QCA

PROFESSIONAL EXPERIENCE

Intel - Software Engineer Intern Cloud Native Team | May 2024 - Aug 2024

- Key software developer working on Release 0.3.0 of the Intel Intent Driven Orchestration, [linked here](#).
- Led the end-to-end development of feature requirements for the Orchestration Planner.
- Worked with the team to ensure secure, production quality code through thorough Code Reviews and by adhering to Intel Release Requirements.

Intel - Software Engineer Intern Cloud Native Team | May 2023 - Jan 2024

- Contributed towards the Intent Driven Orchestration planner which is mainly written in Go.
- Worked on the Kubernetes Power Manager and wrote unit tests that were used in release.
- Worked on the Jenkins CI/CD pipeline used in Intel Shannon for GitHub push conformance.
- Certified by Intel for Software Quality Awareness

SKILLS

Working with Data Analytics

Through my FYP and focused modules I gained extensive experience in data analytics, from interpreting complex datasets to building analytical models and creating insightful visualisations.

Interest in AI.

Placed first in a peer-to-peer Robocode AI building competition that focused on programming an adaptive, reactionary, event-driven system. Winning this course-wide competition earned me bonus marks towards my final grade.

Strong Cloud Native Knowledge

During my two internships with Intel's Cloud Native team, I developed a deep understanding of Kubernetes, Docker, and various container runtimes. I am confident in my ability to leverage cloud technologies to enhance the reliability and scalability of the systems I design.

Java Foundations

Learning to code in Java throughout college through various projects has been foundational in my knowledge of Object Orientated Programming.

Python	Very Proficient
Java	Very Proficient
GO	Very Proficient
Linux	Very Proficient
Data Analytics	Very Proficient
Kubernetes	Very Proficient
Git	Very Proficient
Docker	Very Proficient
Bash Scripting	Very Proficient
Testing & Reviewing	Very Proficient
CI/CD Pipelines	Very Proficient
PHP	Very Proficient
C++	Proficient
Javascript	Proficient
SQL	Proficient
HTML	Proficient
